Art Unit: 1644

1. Claims 9,10,13 are under consideration.

2. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

3. Claims 9,10,13 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

There is no support in the specification as originally filed for the recitation of "with serum proteins other than IgG" in claim 9. Regarding applicants comments, whilst original claim 3 precludes use of IgG as the immunoaffinity ligand in the purification process, it does not state that the purified antibodies do not bind IgG. The cross reactivity of anti Ig antibodies is well known in the art (see Goding, section 8.5). Goding discloses that antisera against IgG cross react with other Ig classes (see section 8.5, page 290). Thus, even if IgG was not present as the immunochromatography ligand, anti IgG antibodies could be present if the immunochromatography ligand was another Ig class (eg. IgM). Thus, original claim 3 does not provide support for the scope of the limitation under consideration because antibodies excluded from claim 9 could be present even if IgG was not used as the immunoaffinity ligand.

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Art Unit: 1644

5. Claims 9,10,13 are rejected under 35 U.S.C. 102(b) as being anticipated by Bourel et al. (EP 1059088 A1) as evidenced by Bruley-Rosset et al.

Bourel et al. disclose purified autoantibodies isolated from IVIg, wherein said autoantibodies bind DNP-Lysine (aka DNP-haptene) and do not bind IgG (see abstract, claims 1-3,9 [0010], [0001], [0014]). Bourel et al. disclose a composition of said antibodies and a pharmaceutically acceptable carrier (see [0070]). It is an inherent property of said antibodies that said antibodies bind cytokines (aka serum proteins, see Bruley-Rosset et al., page 1017, second column, last paragraph). The functional properties of said antibodies recited in the claims are an inherent property of autoantibodies which bind soluble human serum proteins. Said antibodies are capable of forming autoimmune complexes because they are antibodies which bind soluble proteins present in human serum. Said autoantibodies have the property of claim 10 because they are the same as the autoantibodies disclosed in the specification (antibodies which bind soluble human serum proteins).

Regarding applicants comments, as per the instant rejection Bourel et al. also teach compositions other than those with anti-IgG antibodies, wherein said compositions anticipate the instant claims as per above.

6. No claim is allowed.

7. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
